

List of all testing methods within the scope of accreditation D-PL-14165-01-00

Within the specified categories and defined scope of testing, LUFA Nord-West is authorized to include test methods within the scope of its accreditation without the need for prior notification to or approval by DAkKS. The expansion of the scope of accreditation is divided into three distinct categories:

*** (Category A) involves expanding the scope of accreditation to include standardized or equivalent test methods with different versions within a defined test area. This does not apply to the areas covered by the technical modules.

* (Category B) includes Category *** as well as the addition of standardized or equivalent test procedures within a defined test area to the scope of accreditation. Category * encompasses—where applicable—new specifications for test objects, provided these can be determined using the procedures within the test area.

** (Category C) includes Categories *** and *, as well as the extension of the scope of accreditation to include modified, further developed, and newly developed test procedures (including in-house procedures) within a defined test area.
